Chicago, Oct. 7.—WHEAT—Despite a rush of buying orders and a consequent new upturn in prices, the wheat market today was by no means one sided. Predictions that the government report would enlarge the estimate of the spring crop seemed to handicap the bulls. It was said the report would not take into consideration the damage that has been done this week. Opening prices, which ranged from ½c to 2½c higher with December at \$1.05½ to \$1.08½ and May at \$1.08½ to \$1.10, were followed by only a slight further gain before a reaction began that carried the market well below yesterday's close. Gossip was current that the recent advances had occasioned more liberal sales by farmers in the northwest and in Kansas. The close was unsettled at ½c to 1½c net decline, with December at \$1.05½ and May at \$100½.

CORN—Corn showed strength owing to a forecast of freezing weather. On the advance, however, country houses took the selling side. After opening ½c off to ½c higher the market steadled at a moderate general advance.
